

# EZ-GRIP

## SLIP CONTROL AGENT FOR USE IN CONCRETE SEALERS

Ez-Grip is micronized polypropylene powder that adds slip resistance to any concrete sealer. Ez-Grip will give a smoother feel than other types of anti-slip agents due to its special unique properties and produces a uniform texture.

<b>Type:</b>	Colorless, inert slip resistance agent
<b>Toxicity:</b>	Non-Toxic
<b>VOCs:</b>	None
<b>Flammability:</b>	Non- Flammable
<b>Composition:</b>	N/A
<b>Color:</b>	Colorless
<b>Odor:</b>	Odorless
<b>Coverage:</b>	Varies – See Sealer for Coverage Rates

NOTE: COVERAGE RATES MAY VARY DEPENDING ON POROSITY, TEXTURE, APPLICATION METHOD AND PRIOR SEALER APPLICATION. EXCESS BUILDUP SHOULD BE AVOIDED.

## PRODUCT HIGHLIGHTS

- The clear transparent beads do not affect the color or transparency of a clear coat or a color seal coating.
- Inert: Ez-Grip is completely non-reactive. It will not affect the cure or drying time of acrylic or urethane coatings.
- Non-Toxic: Ez Grip is harmless to the environment and to the operator. If spilled, it can be hosed off with no harmful effects.

## PRODUCT USES

Ez- Grip is added to the coating product before application to improve the safety factor of any coated concrete area where wet slipperiness can be a safety factor.
