

X CRETE

CONCRETE DISSOLVER

X-Crete is a concrete de-bonding agent that reverses the molecular bonding action of cement and turns it back into a loose mix of sand and aggregate that is easily rinsed away. X-Crete is used to clean concrete trucks, mixers, tools, forms, saws and finishing machines without high labor costs and damaging hammer and chisel work.

Type:	Complexing concrete cleaner, remover
Toxicity:	Low - Harmful if swallowed
VOCs:	None
Flammability:	Non- Flammable
Composition:	Organic acidic complexing agents, biodegradable detergents, surfactants and inhibitors
Color:	Pale Yellow
Odor:	Nil
Coverage:	Varies

NOTE: COVERAGE RATES MAY VARY DEPENDING ON POROSITY, TEXTURE, APPLICATION METHOD AND PIROR SEALER APPLICATION. EXCESS BUILDUP SHOULD BE AVOIDED.

PRODUCT HIGHLIGHTS

- No harsh mineral acids: X-Crete is strong but gentle, It does not depend on muriatic acid to dissolve the concrete slowly from the top down with corrosive fumes.
- Molecular action: X-Crete works through an organic complexing agent that literally de-constructs the molecular bond that holds the sand and aggregate together.
- Continues working: Because X-Crete has no volatile mineral acids, it does not evaporate or lost strength rapidly. It keeps on working until the entire mass of concrete is broken down and can be flushed off easily.
- Safe: X-Crete is not corrosive to the skin and has no corrosive fumes to attach the lungs. It does not attack steel or aluminum.

PRODUCT USES

X-Crete is used to remove concrete on trucks, mixers, tools, forms, saws, finishing machines

NOTE: CAN BE USED ON PVC PIPES. TO DO SO POUR A SMALL AMOUNT OF X-CRETE INTO THE PIPE FLUSH WITHIN 2 MINUTES AND REPEAT UNTIL THE PIPE IS OPEN AGAIN.
