

EZ SEAL

WATER-BASED ACRYLIC SEALER

Ez Seal is a non-yellowing, water based acrylic curing and sealing compound with less than 100 VOCs. It's a penetrating and breathable coating that provides a clear finish for both interior and exterior concrete finishes.

Type:	Non-Yellowing Acrylic Copolymer
Form:	Liquid
Odor:	Minimal
Color:	Milky White in the bottle
Clarity:	Clear
Sediment:	None
Stability:	1 Year Minimum
Freeze:	DO NOT let freeze
VOC:	<100 g/l
Adhesion:	Excellent
Solids:	30%
Coverage:	250 Square Feet Per Gallon

Note: coverage rates may vary depending on porosity, texture, application method and prior sealer application. excess build up should be avoided.

APPLCIATIONS

Perfect for low ventilated areas where low VOC's and no fumes are required. Non-Yellowing formula assures product's superior resistance to the elements. Deep penetrating and ultra-low viscosity formula allows for easy application through sprayers. Superior effloresce and alkali resistance compared to common solvent based acrylic sealers.

Can be applied to green concrete and not have adverse effects.
