<b>Dry time:</b>	30 min. to 1 hr tack free. 1 hr foot, 24 hr heavy traffic
<b>VOCs:</b>	< 0grams/liter
<b>Flammability:</b>	Non- Flammable
<b>Color:</b>	Opaque Milky White, dries clear
<b>Odor:</b>	Low
<b>Coverage:</b>	1000-3000 square feet per mixed gallon

NOTE: COVERAGE RATES MAY VARY DEPENDING ON POROSITY, TEXTURE, APPLICATION METHOD AND PRIOR SEALER APPLICATION. EXCESS BUILD UP SHOULD BE AVOIDED.

## PRODUCT HIGHLIGHTS

- Concentrated. One Gallon makes two gallons of product. Add water
- Adds depth and luster to colored concrete.
- Perfect for floors hardened/densified with Concrete DNA™ Densifier
- Creates a long-lasting tough protective shine
- Keeps soiling and contaminants from penetrating making maintenance cleaning faster and more cost effective.
- UV stable
- Low Odor, easy to apply and dries quickly

## PRODUCT USES

- DNA Polishing Guard is designed to give polished surfaces increased sheen while also providing improved resistance to stains. Surfaces treated with Polished Guard increase resistance to abrasion and help to eliminate the need for other additional maintenance treatments such as wax or polish. Use on polished concrete, terrazzo, trowelled concrete floor
